WHAT IS FOREX ?

The foreign exchange market is where currencies are traded. This international market's most unique aspect is that it lacks a central marketplace. Instead, currency trading is conducted electronically over the counter (OTC). This means that all transactions occur via computer networks among traders worldwide rather than on one centralized exchange.

The FX market is the only truly continuous and nonstop trading market in the world. In the past, the forex market was dominated by institutional firms and large banks, which acted on behalf of clients. But it has become more retail-oriented in recent years—traders and investors of all sizes participate in it.
